

3P Technik's latest design. Different from a typical rain barrel this rain water harvest tank has a unique wood effect design. This is perfect on garden decking or in a modern designed landscape. This ultra slim line and space saving water tank has a capacity of 200 l (44 gal.) and features a 3/4 in. brass threaded connection points for a screw in tap (tap included) on either side and side outlet for draining, pump supply or connecting to another tank. Includes brass tap.

Made of food quality polyethylene

German made, high quality construction

UV protection from sunlight

Linkable to other barrels for increased capacity

Reduce water costs and the strain on water consumption

Provide your plants with natural rain water
